Press release from: [BeamYourScreen](#)

With its core desktop sharing technology having undertaken significant speed developments, Mikogo announces its fastest solution to free online meetings. By employing Mikogo's screen sharing capabilities, businesses can now host meetings, presentations and remote support sessions with a true real-time online collaboration experience. The result: this giraffe will give the cheetahs a run for their money.

Mannheim, GERMANY February 17, 2009 – The free desktop sharing tool, Mikogo ([www.mikogo.com](http://www.mikogo.com)), has announced the release of its latest and fastest software version, having incorporated impressive speed developments that have improved how people meet and collaborate in real-time over the Web.

A key feature that contributes to Mikogo's recent speed, is that of the Instant Screen Build-Up. “By enabling this feature, the meeting participants will see any screen changes the organizer makes in faster response time,” explains Mark Zondler, Co-Founder of Mikogo. “Mikogo achieves this by displaying screen changes on the participant's screen as and when screen data arrives. This will ensure that screen updates are displayed as fast as possible and that real-time collaboration is accomplished via Mikogo.”

In an effort to save time and money, businesses continue to seek ways to accomplish tasks via online collaboration, and hence a reliable real-time screen sharing solution becomes the gem of corporate Web tools. Take for example tech support personnel remotely assisting clients, sales reps conducting product demos, or consultants making Web presentations.

In fact anyone wishing to collaborate via the Internet is in need of the most reliable solution to real-time collaboration in order to get the task done professionally and efficiently. Clearly this depends heavily on the speed of the desktop sharing technology involved.

With Mikogo's improved speed and core technology, businesses have a solution that will reliably and quickly transmit any screen content over the Web, including high-definition graphics and images.

Already used in over 160 countries and available at no cost for businesses and private users, Mikogo is a free desktop sharing tool with many features for online meetings, remote support, presentations, and group collaboration. Now with the release of Version 2.0.3, Mikogo will bring new meaning to how businesses collaborate online in real-time.

### About Mikogo

Mikogo incorporates innovative screen sharing technology to provide an easy-to-use free online meeting solution, welcoming everyone to high-quality online collaboration. The popular software tool is now supplying its cost free solution in over 160 countries, primarily private users, freelancers and small businesses. Launched in 2007, Mikogo is provided by the renowned provider of web collaboration solutions, BeamYourScreen, whose product range consists of software solutions for online meetings, online presentations, and remote support. At present, more than 1400 corporate customers in over 40 countries worldwide are using the BeamYourScreen technology and benefiting from significantly reduced travel time and travel expenses.
