

UniversiTools Career Center Software Manages University Placement Services

Date: 02-19-2009 12:31 AM CET

Category: [IT, New Media & Software](#)

Press release from: [White Mountain Technologies](#)

White Mountain Technologies has launched UniversiTools Career Center solution, which integrates with its other management modules for universities and institutions of higher education.

UniversiTools Career Center optimizes the services of college career planning and placement offices with superior matching of students seeking internships and employment with companies recruiting talented human resources.

Students post their CVs (resumes) online, while companies post their job vacancies. UniversiTools Career Center matches and alerts relevant parties automatically.

University career placement offices manage the entire recruitment process, including communication, tracking of successful matches, analytics, and feedback for quality control. Career centers can effectively manage corporate relations and keep up-to-date with local employment opportunities by recruiting employers to on-campus job fairs and career exhibitions.

“Students go to university or college to eventually find a good job. We designed UniversiTools Career Center to help higher education institutions provide their students with a proper transition between academic study and a career path,” explains Ghassan Abboud, Managing Director of White Mountain. “For students, this transition comes after years of studying and dreaming about their future.”

UniversiTools Career Center, and other university management software modules, run as stand-alone or integrate seamlessly with existing Student Information Systems (SIS) used by many universities, like Banner, CampusVue, and others.

Further, UniversiTools is multilingual, with interfaces available in English, French, and Arabic, highly suitable for universities in the Middle East and North Africa. Regional members of the UniversiTools user community include the American University of Beirut (AUB), American University in Dubai (AUD), and Holy Spirit University of Kaslik (USEK) in Lebanon.

Additionally, UniversiTools software solution includes scheduling modules for guaranteed 100% conflict-free exam scheduling, classroom scheduling, and locating common times among professors and students.

Other management software modules allow administrators to manage alumni relations, grants, scholarships and donations, resources and facilities, and academic year calendars.

For a 15-minute presentation about UniversiTools university software, contact Nicholas Matta at White Mountain Technologies or submit the online request form at [UniversiTools.com](#).

About UniversiTools

UniversiTools (or University Tools) university management software modules help universities and institutions of higher education manage academic year cycles and services: class scheduler module, exam scheduler module, academic calendar year creator module, course catalog module, resource facilities allocation module, grants & scholarships module, career center module, and alumni module.

UniversiTools complements other education administration software from White Mountain. Skoollee Tools school management software and student information system is designed specifically for multilingual international, private and progressive public schools in the Middle East and North Africa.

BaseCamp LMS (learning management system) helps medium to large companies and organizations manage their executive and professional education and training requirements.
