

## Tonometry through the EYELID Diaton to be exhibited at FOMA convention, Florida

Date: 02-19-2009 12:49 AM CET

Category: [Health & Medicine](#)

Press release from: [BiCOM Inc.](#)

Diaton tonometer (Glaucoma Eye Test) will be exhibited at FOMA 2009, Ft.Lauderdale. Diaton Tonometry is a NEW approach to measuring intraocular pressure (IOP) THROUGH THE EYELID - painless, no contact with the cornea, no anesthesia or sterilization is required. BiCOM's pen-like, portable, hand-held device is ideal for measuring eye pressure and helps in diagnosis and prevention of blindness caused by Glaucoma. Tonometer Diaton is irreplaceable for mass glaucoma screenings in children and adults.

FDA approved - this unique trans-palpebral and trans-scleral methodology has received the Gold Medal at the International Exhibition of Innovation Research and New Technology - "Brussels Eureka" & the Gold Medal at the International Exhibition of Research and new Technology in Geneva. Details at [www.TonometerDIATON.com](http://www.TonometerDIATON.com)

Diaton Tonometer is intended for use by Inpatient & Outpatient Clinics such as Hospitals, Emergency Rooms, Nursing & Elderly Homes, General & Specialty Practitioners as well as Ophthalmologists and Optometrists.

Glaucoma is the leading cause of blindness in all age groups - from children to senior citizens. Everyone needs to get diagnosed to prevent blindness.

Besides determining the potential for glaucoma onset, Tonometer Diaton can also be used for monitoring treatment effectiveness throughout the day. Unlike other tonometers, Diaton can be used repeatedly during the day with no harmful effect on the eye.

MicroVas by Phycon Medical will also be exhibiting at FOMA 2009. MicoVas is used to increase blood flow and raise pressure gradients across capillary beds by significantly increasing venous return, the primary controller of cardiac output. Not only does MicroVas increase cellular oxygen levels within minutes but the levels remain sustained, resulting in faster healing not seen previously. MicroVas also strengthens muscles, stimulating a three mile walk during the usual 45 minute office

therapy.

About BiCOM Inc:

BiCOM, with its 15 years of tradition and global clientele, has proven to be the enterprise of the highest level of professionalism, integrity and financial solvency. A unique team of engineers, medical, legal and business experts makes BiCOM Inc. the right place for global talent to find support and guidance. BiCOM Inc. sees its mission in bringing to market innovative products developed and manufactured worldwide.

BiCOM represents and supports Diaton tonometers in over 30 countries and growing.
