

Shuttle releases XPC Barebone SN78SH7 for Phenom II processors from AMD

Date: 02-23-2009 06:23 PM CET

Category: [IT, New Media & Software](#)

Press release from: [Shuttle Computer Handels GmbH](#)

CPU's in 45nm micro architecture now compatible / BIOS Update ready for download

Shuttle Inc., the market leader in the Mini-PC segment and manufacturer of Multi-Form-Factor solutions expands the CPU compatibility for the XPC Barebone SN78SH7. A newly published BIOS version now enables the use of AMD Phenom II processors.

Besides current AM2 and AM2+ processors, the state-of-the-art 45nm models Phenom II X4 940 and Phenom II 920 with four cores are now also officially supported.

The compact XPC Barebone SN78SH7 with case dimensions of only 32.5 x 20.8 x 18.9 cm (DWH) uses brushed aluminium with a high-grade finish. The core of the robust Mini hides a NVIDIA GeForce 8200 chipset and the graphics processor of the same name. Picture and sound are transferred in excellent HD quality via the integrated HDCP-compliant HDMI interface. The package is rounded off by a PCI-Express 2.0 (x16) and one PCI slot, a Gigabit LAN interface and eSATA connectors.

The Shuttle XPC Barebone SN78SH7 is now available at an RRP of EUR 281 (ex VAT).

BIOS file as download (SN78S10P)
