

New Titan Heating Oil Tanks debut online at TankDepot.co.uk

Date: 02-26-2009 02:12 PM CET

Category: [Energy & Environment](#)

Press release from: TankDepot.co.uk

Online oil tank specialist TankDepot.co.uk, has announced three significant new additions to the company's range of environmentally preferred, bunded, heating oil tanks.

The three new Titan Ecosafe models are manufactured in the UK by Kingspan Environmental. Designed to exceed all applicable British and European requirements, the new additions are ideal for the storage of heating oil at domestic and small commercial installations.

The squat stance of the new 1,200 litre Titan ESLP1200B Low Profile Bunded Tank, makes it ideal for installation in rural areas. At just over a metre tall, it can easily be concealed behind a dry stone wall. Competitively priced, the ESLP1200B is now the entry point to the Titan Ecosafe range.

Complementing the ESLP1200B are two new Titan Ecosafe 'Vertical' models. The 1,300 litre ESV1300B/T is ideal for the storage of heating oil at smaller and medium size domestic installations. Usefully at a time when counting the pennies has never been more important, the ESV1300B/T is competitively priced and indeed costs less than comparable 'Horizontal' models.

The ESV1300B/T's 'big brother' is the ESV2500B/T – another new addition to the Titan Ecosafe range. The 2,500 litre capacity of the ESV2500B/T makes it the ideal choice for both larger domestic and smaller commercial installations and its compact space saving design, makes it easier to install too.

According to TankDepot.co.uk's Philip Breek, "The Titan Ecosafe Bunded Tank range is an established favourite with UK oil heating technicians and oil tank installers. As the UK oil tank market moves away from old-fashioned single skin tanks, toward bunded tanks, these latest additions to the Ecosafe range ensure there is now an environmentally preferred, bunded tank, for almost any oil storage installation.

"Like all models in the Ecosafe range, these latest additions benefit from a high specification as standard. All Ecosafe tanks are supplied complete with Watchman electronic oil tank contents gauge; oil tank connection pack; bund warning alarm; bund drain off point; factory fitted vent, inspection and fill points; and lockable, manhole access.

"Manufactured in the EU's most advanced rotational moulding facility, they are also supplied with a ten year, conditional, guarantee as standard."

The ESLP1200B, ESV1300B/T and ESV2500B/T are now available to order online directly from TankDepot.co.uk, together with over 200 different tanks for the safe, secure and environmentally responsible storage of agricultural fuel oil, biodiesel, diesel, heating oil, waste oil and water.
