Press release from: [White Mountain Technologies](#)

Michael E. DeBakey High School for Health Professions at Qatar (DHSHPQ) has selected Skoolee Tools as its vanguard School Management and Student Information Software.

The school's main campus in Houston, Texas is ranked 56 in the Top 100 High Schools in the United States by U.S. News & World Report, based on the College Readiness Index. The medical science-focused high school is named in honor of renowned heart surgeon and medical researcher of Lebanese origin, Dr. Michael E. DeBakey.

"As a new subscriber to Skoolee," explains Charlesetta Deason, Ed.D., President and CEO, "I am looking forward to this educational software meeting the data management needs of Michael E. DeBakey High School. This software promises to serve as the tool we have been seeking. We are excited about the endless possibilities Skoolee will provide us."

For Agnes Bell, DeBakey High School Principal, Skoolee Tools will be the front line administration and communication system to manage relations among all school stakeholders. "Integrating Skoolee technology into our educational program will allow us to enhance instruction, accountability, transparency, and communication between students, teachers, parents, and administrators," she says.

Developed by White Mountain Technologies, Skoolee Tools is tailored for English, Arabic, and/or French requirements to support e-learning in private, international and progressive public schools in the Middle East and North Africa. The software integrates a school's diverse functions and requirements and consolidates them into an efficient and coherent community.

"Technology," Dr. Deason concludes, "is an essential educational tool in the 21st century. The appropriate educational technology will allow the school to maintain communication with all the school's stakeholders and provide seamless, in-time appropriate and accurate information required to parents. It will provide them an opportunity to become an informed participant and partner in their children's education."

For additional information or a 20-minute live presentation, contact Romy Haddad at White Mountain Technologies or submit the Request Information form at skooleetools.com. Visit DHSHPQ web site at debakeyatqatar.com.

About Skoolee Tools

Skoolee is an evolving online initiative for the education sector in the Middle East and Africa.

As a first step, Skoolee Tools offers a customizable software solution, in which a school's existing data is migrated into the system. It includes functionality critical to school administration: user-friendly registration, fee and payment system; standardization of school processes; consolidation for school management organizations; teacher and course assessment; SMS messaging capabilities for parents; discussion boards for tutorials and creative thinking; sophisticated online exams and grading; and conduct reporting, among others.

The brand is sometimes referred to as Skool Tools, School Tools, Skooli, Skoolie, Schooli, Skoole, Skooly, Schoolee, or Schooly.

Skoolee Tools complements other White Mountain software products for the global education sector:

UniversiTools (or University Tools) software modules help universities and institutions of higher education manage academic year cycles and services: exam scheduling, classroom scheduling, finding common times, alumni management, career placement, grants & scholarships, resource & facilities allocation, and creating academic year calendars.

BaseCamp LMS corporate learning management system helps medium to large companies and organizations manage their executive and professional education and training requirements online.
