

DeskCenter announces ThinApp Editor

Date: 03-04-2009 06:14 PM CET

Category: [IT, New Media & Software](#)

Press release from: [DeskCenter Solutions AG](#)

Agency: **DeskCenter Solutions**

Client management expert DeskCenter now offers the new ThinApp Editor, a tool to easily edit and modify VMware ThinApp packages.

It is now freely available from the manufacturer's website in German and English.

With the ThinApp Editor it is possible to edit and modify already recorded installations. This is especially convenient for small changes, since it is not necessary to repeat the whole recording process. The graphical user interface provides useful functions to modify the virtual application package and all package options, such as editing registry entries or integrated files. After all settings have been made, the build process can be started and the virtualized application can be locally installed or tested.

DeskCenter ThinApp Editor is freely available (Freeware) and may be downloaded without any limitations from the manufacturer's website.

Product Information about DeskCenter Management Suite

The solutions' modules include hardware and software inventory, efficient access to many management functions (e.g. for removal of system errors or problems) and an asset management to control the lifecycle of IT systems from purchase to disposal.

Furthermore, the DeskCenter Management Suite offers a helpdesk solution for central management of jobs and user problems, operating system and software deployment and automated detection and monitoring of software licenses.

The Leipzig based company DeskCenter Solutions is the manufacturer of the client management solution DeskCenter Management Suite.

Based on over 15 years of experience in system management, DeskCenter develops its solution in continuous co-operation with its customers. All support staff and also the developers are situated in the manufacturer's location to provide the best possible support and a fast implementation of functional development.

To provide an optimal support for its customers, the DeskCenter Solutions AG has a global network of partners. This guarantees a reliable regional support in terms of setup, integration and operation of all products. As a result to this philosophy, numerous well-known companies, like Volkswagen AG, Lufthansa AirPlus GmbH or PricewaterhouseCoopers Ltd., already trust in the software of DeskCenter Solutions AG.
