

## Latest process management system “Stages for CMMI®” will be presented at SEPG 2009

Date: 03-11-2009 08:17 PM CET

Category: [IT, New Media & Software](#)

Press release from: [METHOD PARK America](#)

SEPG 2009, in San Jose California marks the launch of Method Park’s latest process management system “Stages for CMMI®” to industry experts. This tool is part of an extensive service and product portfolio especially designed for the CMMI® market.

“Stages for CMMI®” puts the focus on people instead of process theory. This dramatically lowers the acceptance hurdle and enables companies to take control of their development time, cost and quality.” says Dr. Erich Meier, board member of Method Park Software AG and responsible for product development.

The web-based process management portal "Stages" allows you to model your processes and assure the compliance of processes to CMMI. Stages integrates into the engineering and business environment to manage and encourage information flow in accordance with the defined processes.

Taking place annually throughout the United States the SEPG North America has earned world-wide recognition as the premier CMMI® event attracting over 1,000 leading executives, engineers, and technologists from around the globe.

### About Method Park

Method Park’s engineers and consultants are experts in the field of software development for automotive and medical systems, especially where high demands on quality and safety are made. We are your experienced partner for engineering services, coaching, training and consulting in software development processes and process maturity models.

Method Park, which was founded in 2001 in Erlangen, Germany, currently has more than 120 employees. Method Park has subsidiaries in Erlangen, Freiburg, Munich and Stuttgart in Germany, as well as Detroit and San José in the USA.
