Press release from: [BiCOM Inc.](#)

BiCOM Inc. is proud to present its unsurpassed Trans-palpebral and Tras-scleral tonometer Diaton to the American Society of Cataract and Refractive Surgery ASCRS on April 3th – 8th, hosted by the city of San Francisco. With FDA approval, CE MARK and now Health Canada approval opens many international doors for BiCOM Inc., a global distributor of Diaton tonometers.

Exhibition of Diaton tonometer to the members of American Society of Cataract and Refractive Surgery (ASCRS) presents the opportunity for BiCOM to display the incomparable unique qualities of trans-palpebral and tras-scleral Diaton tonometry – tonometry through the Eyelid.

Diaton Tonometry is an unparalleled approach to measuring intraocular pressure (IOP) THROUGH THE EYELID - no contact with the cornea, no anesthetic drops or sterilization is required. BiCOM's pen-like, hand-held, portable device is ideal for measuring eye pressure (IOP) and helps ophthalmologists and optometrists in diagnosis and prevention of blindness caused by glaucoma, the number one cause of preventable blindness in the United States. This ophthalmic device is irreplaceable for mass glaucoma screenings.

Diaton Tonometer will be showcased by Optimetrics Inc. Florida's largest Hispanic Ophthalmic Leader. With well over 20 years of experience providing quality, new and used ophthalmic equipment and supplies to optometrists and ophthalmologists, and optical retailers. Optimetrics is located in Miami; one of the largest exporting and importing ports of the United States Optimetric offers the latest technology in equipment available today. State of the art showroom displays a variety of products ranging from a simple bulb to a visual field analyzer, chairs and stands, autorefractors, corneal topographers and much, much more.

The founder, Amado Diaz, was the youngest ophthalmic dealer in the country when he started Optimetrics, Inc. His training and experience cover a wide globe of suppliers in the ophthalmic industry from companies like BiCOM, Nikon, Topcon, Marco, Welch Allyn, Carl Zeiss, Tomey, RH Burton, Haag-Streit, HGM Laser, Sonomed, Canon, AIT, Essilor, Humphreys, Vision-Ease, Katena, and many others.

There is a notable benefit in patients after Refractive Surgery or with Corneal Pathology since the Diaton does NOT applanate the cornea. The Diaton tonometer is a clinically useful device in the IOP measurement of both children and adults. Diaton readings are independent of corneal irregularities such as thickness, crookedness, etc.

Tonometer Diaton is the perfect solution in the following cases when the use of other tonometry devices is problematic or impossible: Conjunctivitis, Keratitis, Keratone, Cornea Dimness, Keratoplastics, Keratoprosthesis, LASIK, LASEK, PRK, Ametropy, Astigmatism, etc.

BiCOM Inc. covers the full scope of customer service, which involves client training, follow ups, hotline support, sales support, etc. To get more information on the device or to make a purchase, visit the official website - www.DiatonTonometer.com, or call BiCOM at the toll free number 1-877-diatons (877.342.8667).
