

Synchronizing Outlook (again) 7x faster: Easy2Sync for Outlook 3.00

Date: 04-16-2009 02:22 PM CET

Category: [IT, New Media & Software](#)

Press release from: [IT-Services Thomas Holz](#)

Dormagen, Germany - April 15, 2009: ITSTH has published the new version 3.00 of the Outlook synchronization software Easy2Sync for Outlook. It is up to 7x faster than the previous version. This rapid speed improvement has tradition. Already the version 2.00 that was published in 2008 was 7x faster than the previous one. The effect of both improvements in combination is dramatic: Even large PST files are synchronized literally in seconds.

The new release 3.00 shows its strength especially in slow network environments and large e-mail folders. Here speed increases even greater than the factor 7 are possible.

Overview:

Easy2Sync for Outlook is an award-winning and simple to use software to synchronize Microsoft Outlook. It automatically recognizes when an e-mail, contact, calendar item, note or task was created/changed/deleted and syncs this to the respective other computer. This can be used to keep desktop and notebook computer always up-to-date with the same data. Apart from the sync mode, the software also supports modes to create a backup, move e-mail or merge multiple calendars into one team calendar.

The program is easy to use and to configure to the user's preferences. From list views and confirmations to a completely automatic sync without windows, everything is possible.

Easy2Sync for Outlook synchronizes Microsoft Outlook data in PST files and Exchange profiles. All versions/combinations since Outlook 97 and Windows 98 (this includes Vista and Outlook 2007) are supported. The update is free for all registered users of Easy2Sync for Outlook 1.x or 2.x

===Pricing and Availability===

Easy2Sync for Outlook 3.00 runs under Windows 98, MT, NT, 2000, XP, 2003 and Vista and costs \$39 (USD) for a home edition license and \$59 (USD) for a business edition. Registered customers are entitled to the unlimited functionality, free updates and lifetime technical support. More information on the product as well as its fully-functional freeware edition can be found on our homepage
