Press release from: [TOPEX](#)

Agency: **TOPEX**

TOPEX, a European telecom equipment manufacturer and NGN solution provider, has released a new version for its GSM boards launching the 4 channels board designed for its GSM/UMTS Gateway family.

The new board holds 4 GSM/UMTS modules, with 1 SIM card associated per each channel. In this way, the call capacity of GSM/UMTS Gateway family is doubled, the multiACCESS equipment reaching up to 64 simultaneous calls and the Qutex equipment up to 20.

With the new release TOPEX GSM/UMTS Gateways family keeps the same features and services; renowned for its powerful SIP&H323 protocols stack, LCR module, SS7 platform, Call Back, Auto Clip Routing and CDR features.

The standard use of the equipments allows the client to interface the PSTN traditional network through E1 interface to IP networks providing direct routing between IP, digital, analog and GSM networks.

Its main functionality is to interconnect VoIP & PSTN networks with all kind of GSM networks with benefits like Least Cost Routing. It's a great solution for large companies with high voice traffic to GSM networks, Call Centers or alternative carriers.

“By launching this new 4 modules card, we have once more demonstrated our capabilities and expertise in the convergent networks field, having also the opportunity to expand our portfolio. We hope this new release will consolidate our position as important supplier of advanced telecommunication products on the telecom market.”, declared Mr. Constantin Dumitrescu, Sales and Marketing Director TOPEX.

About TOPEX:

TOPEX is among the most innovative, fast growing European manufacturers of telecommunication equipment, providing a wide range of telecommunication applications. The company has over 19 years of experience in research, development and manufacture of both civil and military telecommunication devices.

TOPEX's leveraged expertise includes: Next Generation Network solutions Softswitch, Media Gateways for TDM, VoIP, GSM and CDMA (2G, 3G), Signaling Gateways (SS7, ISDN, R2, SIP and H323), Broadband Wi-Fi Mobile Routers, Fixed-Mobile Terminals (2G, 3G) and ATC Voice Communication Systems.
