Press release from: [Tpad](#)

Tpad.com is focused on providing superior telephony services that utilize state-of-the-art communications technology.

The focus of the Tpad Global Phone Network is to provide small businesses with cutting edge telephony services that reach beyond the capability of traditional PBX systems at reduced costs. Tpad is dedicated to filling the demand for a communications system that can easily manage the growing need for around the clock, instant access and response to information. It has been proven that companies that migrate to Voice over Internet Protocol (VoIP) technology can realize a cost savings of nearly 50% compared to the same level of usage with a traditional PBX system.

While the various means of communication continues to evolve and expand, so does the need to be able to deliver the message efficiently and cost effectively. The global events that are re-shaping the commercial playing field are definitely challenging: companies that want to continue to prosper are taking a proactive approach to managing their communications systems and turning to Tpad for solutions.

The motivation for the shift to alternative business communications systems that include both mobile and Internet telephony technology is simple: to provide greater flexibility in the method of being accessible to customers and being responsive to their needs. For residential clients throughout the United Kingdom and the world, it broadens their communication potential, providing alternative means to tailor a system that accommodates their lifestyle. The source of the cost savings that companies gain is based on more than just reduced rates. Superior call quality in addition to on-demand, online support from a responsive client services management team ensures that your time, as well as your budget, receives the attention and respect they deserve.

The business communication systems for the small and medium enterprises (SMEs) today must be flexible enough to encompass a variety to applications from local calling to international as well as providing networking capabilities for branch offices and a travelling or telecommuting staff. Tpad's services are not only affordable but they are scalable to suit any level of usage required, whether the company is an entrepreneurial venture or an international corporation.

Tpad keeps a watchful eye on your telephony system while providing you stress-free services that encourage an active dialogue with everyone regardless of where on the global they are physically located. Monitoring the system for international or local clients include all of the traditional call features such as forwarding, contact book, conference bridge and voicemail plus the ability to use IP phones (Linksys, Snom, Aastra or Grandstream) or analogue phones (via Linksys ATA), call blocking and voicemail to email.

Now with Tpad's scalable service packages SMEs that require outstanding and reliable telephony services no longer need to allocate additional resources to accomplish their communication goals. Utilizing Tpad's global phone network supports the short- and long-term business objectives for the world's dynamic commercial environment.

To customize your company's communication solution, you can telephone our client management support team at: 0845 1221746 or complete our customer enquiry form online at: www.tpad.com/business/ for a free telephone quote and specialised

advice.
