Press release from: [ProjectWizards](#)

Melle, Germany, May 13, 2009: Project management consultants, ProjectWizards, is pleased to announce the release of Merlin 2.7, the award-winning professional project management solution for Mac OS X, Merlin Server 2.7, the dedicated server companion to Merlin enabling centralized project management, and Merlin iPhone 1.01, the official mobile companion product for Merlin. These three products combine to offer a more robust and centralized networking solution so one can literally access Merlin projects at anytime, from anywhere.

“With the release of Merlin 2.7 and the new companion products, Merlin Server and Merlin iPhone, Merlin has begun a new chapter in offering collaborative project management,” says ProjectWizards’ CEO Frank Blome. “Never before has one found a way to collaborate and work on projects in such a convenient way. Project management has gone truly mobile with Merlin iPhone, and customers will now be able to centralize their project management activities using Merlin Server.”

“Beta feedback was very positive in terms of enabling access to projects from anywhere at anytime by taking advantage of Merlin’s iPhone publishing capability,” says Blome. “We’ve now also answered customers requests to offer centralized project management to ease the sharing of projects, thanks to Merlin Server. What customers found most remarkable about Merlin Server is how easy it is to set up. It’s simply a matter of turning on a Mac OS X system preference and deciding how you wish to share your projects.

In addition to the new Merlin iPhone and Merlin Server companion products, Merlin 2.7 includes enhancements to increase stability, ease of use, and overall performance. For more information or to download Merlin 2.7, Merlin Server 2.7, and Merlin iPhone 1.01, please visit www.projectwizards.net.
