Press release from: [pbxnsip](#)

Leeds UK, 29th May 2009 – pbxnsip, a leader in SIP-based IP PBX software for Microsoft Windows, MAC and Linux environments, today announces the long awaited release of their NEW Leeds and London training suites, in response to increased growing demand from partners and resellers needing advanced IP PBX, VoIP, SIP and Microsoft product training. The initiative will to strengthen the partners knowledge base and create a new vertical for converged IP telephony solution utilising pbxnsip. The training suites are geared up to offer partners the opportunity to learn not only about pbxnsip but also about Microsoft applications such as Office Communications Server and Exchange Server, as well as 3rd party vendor applications and compatible hardware products such as Snom, Polycom, Cisco and Linksys IP Telephones, plus gateways from ratified vendor partners such as VegaStream, Sangoma, Patton, Quintum, Audiocodes, Skype, Teles and Mediatrix. This new initiative will complement the pbxnsip IP PBX product offering greatly and its array of the latest IP PBX features can be used to their full advantage once partners know where to place the solution and how to utilise its services and functionality.

The new state of the art training and demonstration suites are part of the pbxnsip 'VoIP education initiative' to help partners and customers both understand the IP industry and to help the convergence between tradition telecommunications and IP telephony technology. pbxnsip have been leading the IP PBX industry for many years and are seeing an increasing demand for legacy telephone systems engineers and PABX resellers and installation companies to enter the VoIP or IP PBX market.

“Dates have already been set for the next 6 months for pbxnsip, Microsoft, SIP and VoIP training sessions and we have already seen a great response from our resellers and distributors who are willing to travel from all over world to attend seminars and demonstrations, held by our expert training and support team. I'm very excited for Q2 and Q3 2009 as I'm sure we will see yet another improvement in channel performance, following the training and support we are offering our partners. I think that our commitment to showing that channel that we are willing to invest time and money back into them will be a great driving force to work closely with them in procuring good long term business cliental”, commented John Bennett, European Sales Director at pbxnsip Europe Ltd.

“Our new training division will complement the range of IP related services we are planning on releasing in 2009. We are responding to the many requests from partners who said they wanted professional on-site and classroom based training services for their employees, engineers and sales executives. This was particularly expressed by partners who have changed or migrated from different backgrounds other than IP, or customers with new requirements outside the traditional telecom field who wish to learn how to manage their equipment”, added Jonathan Greenwood, CEO at pbxnsip Europe Ltd.

About pbxnsip

pbxnsip (www.pbxnsip.eu.com) makes SIP-based Private Branch Exchange (PBX) telephone systems. The Session Initiation Protocol (SIP) is used to talk to attached devices like telephones, PSTN gateways and SIP service providers. The pbxnsip PBX is used to put the components from different vendors together in an enterprise communication system. Customers benefit from a modern PBX feature set that includes mobility support, computer telephone integration, and vendor independency. pbxnsip also respects the security requirements of a business critical application. Customers may run the PBX on Microsoft Windows, Mac and Linux-based servers and on embedded appliances. pbxnsip Inc was incorporated in 2005 and is located in Andover, Massachusetts, USA and pbxnsip Europe Ltd was created in 2008 and is located in Leeds, United Kingdom.
