

## New Barcode Font Package Supports Stacked Barcodes

Date: 06-02-2009 09:23 PM CET

Category: [IT, New Media & Software](#)

Press release from: [ConnectCode Pte Ltd](#)

ConnectCode Pte Ltd is pleased to announce a new barcode font package (v5.2) that supports the stacked barcodes in the GS1 Databar Family. The stacked barcodes are multi-row barcodes that are stacked on top of one another. These are compact barcodes that may be read by special scanners or barcode reading softwares. The new fonts are built upon a solid foundation that is already used by many Fortune 500 companies around the world.

A barcode font is a specially designed font that allows you to create barcodes using normal text characters. Working with it is as simple as installing the fonts, and copying the barcode text from the built-in Encoder. The versatility of a barcode font makes it easy to enable barcodes in third party applications that support text display. It is ideal for projects that prefer a text-based solution (instead of a graphical-based solution) for their barcoding needs. A common use for the barcode fonts is the mass generation of barcodes for a column of cells in spreadsheets.

The barcode fonts that are supported in the new package are listed below:

- Codabar Barcode
- Code39 Barcode
- Code39 Ascii Barcode
- Code93 Barcode
- Code128 (Auto/A/B/C) Barcode
- UCCEAN Barcode
- I2of5 Barcode (Interleaved 2 of 5)
- Industrial 2of5 Barcode
- ITF14 Barcode
- Modified Plessey Barcode
- POSTNET Barcode
- EAN 13 Barcode (European Article Numbering)
- EAN 8 Barcode
- UPCA Barcode (Universal Product Code)
- UPCE Barcode
- ISBN/ISSN/EXT2/EXT5 Barcode
- GS1 Databar 14
- GS1 Databar 14 Truncated
- GS1 Databar Limited
- GS1 Databar Expanded
- GS1 Databar Stacked
- GS1 Databar Stacked Omni
- GS1 Databar Expanded Stacked

A free trial for the font package is available at
