Press release from: [Granite Shield](#)

Granite with Granite Shield is the first branded granite on the planet to receive the Kosher certification

Since 2002 Granite Shield has been striving to produce the best sealers in the industry and with its one of kind process which leaves granite smoother, shinier and virtually non porous, Granite Shield can seal and certify a customers countertops Kosher bringing peace of mind that their countertops are protected with the finest product available on the market. "Being the first branded Kosher granite certified on the planet is an honor" says Craig Phillips CEO of Granite Shield Inc. During this economic downturn Granite Shield Inc. has thrived due to its commitment to help granite fabricators and customers get more value for their investment in their homes and projects.

Customers now are seeking granite countertops that offer a lifetime warranty against staining to protect their investment. Granite Shield, the first and only company who can offer the beauty of natural true granite complete with a lifetime warranty against stains or discoloring. With granite by Granite Shield Countertops or granite sealed by Granite Shield you don't have to worry about rushing to wipe up spills, worry about acidic liquids, alcohol, using coasters, placemats or use special cleaners ever again.

Craig Phillips is the creator of the Granite Shield permanent granite lifetime sealing process. Granite Shield was started and developed in 2002. Many independent granite fabricators throughout the United States have been offering their customers Granite Shield's permanent lifetime sealing process since 2002.

Granite Shield achieves their lifetime sealing process for granite using proprietary catalyzing polymers. These chemicals are not standard sealers purchased over the counter but specifically made for Granite Shield by their chemists and can't be found anywhere else or used by anyone else other than an authorized Granite Shield applicator or fabricator.

Craig developed back in 2002 the permanent sealing process for granite using different catalyzing polymers. Depending if the granite is considered light, medium or dark, each type of stone takes a different application process and then is capped with catalyzing polymers with a permanent carbon crystal sealant which then locks the catalyzing polymer into the stone. The carbon crystal sealant forms a molecular bond with the granite which can not be removed thus creating a lifetime seal plus leaving your granite more vibrant, smoother, shinier and maintenance free. The Granite Shield sealing process has no plastic, silicone or resins and it is a breathable, penetrating sealer. It is not topical and will not scratch or yellow.

Granite Shield is the first and only to have this process, don't be fooled by imitators even if it's a well known company. If it doesn't say Granite Shield, it's not permanently shielded with a no restriction lifetime warranty like Granite Shield.

Visit www.GraniteShield.com website and view a video demonstration of what Granite Shield can do verses other sealers or presealed granite and also natural stone, stainless steel, glass, shower doors and concrete.

Granite Shield is located in 45 states and in Canada, Australia, New Zealand, England and Ireland with 80 authorized applicators, 45 are granite fabricators.
