Press release from: [serVonic GmbH](#)

Olching, 8th June 2009: The manufacturers Siemens, AudioCodes and serVonic successfully tested and realized a Unified Communications-project. The connection of Microsoft OCS, Microsoft Exchange Unified Messaging, AudioCodes Media Gateways and serVonic's unified messaging solution IXI-UMS was realized at Siemens.

With the test connection, the Microsoft Office Communications Server 2007 was connected to AudioCodes Media Gateway Mediant 1000 parallel to serVonic's IXI-UMS Server in order to test the concurrent operation of MS OCS and IXI-UMS.

The successful implementation of IXI-UMS in this complex environment characterizes serVonic's Unified Communication strategy: Especially in times of change of the PBX- and IT-environments in companies, the UC-solutions from serVonic can be operated in a multitude of possible PBX- and IT-constellations due to their orientation towards common standards.

IXI-UMS from serVonic is add-on software that enhances the available IT-environment with the features Fax, Voice, SMS and remote inquiry by mobile phone or telephone. IXI-UMS normally integrates in messaging systems such as Microsoft Exchange or IBM Lotus Domino. Because of the flexible Connector architecture, an installation in mixed environments – messaging-, ERP- or CRM-systems – is also possible without any problems. A high scalability of the solution allows the flexible deployment in environments of 10 up to several 10.000 users. The software manufacturer is also able to cope with complex requirements in terms of high availability and security with particularly developed concepts.

Prices and Availability

IXI-UMS Unified Messaging Server is available at serVonic and sales partners for prices beginning at 990,- € (plus legal VAT, if applicable).

serVonic, headquartered in Olching near Munich, Germany, is a leading manufacturer of software solutions with focus on unified communication with unified messaging and CTI. The products of serVonic support existing standards like standard interfaces and standard hardware; proprietary solutions are avoided. The company strives to provide its customers with future-oriented product development, with a focus on integration in available environments. serVonic is partner of Dialogic, Funkwerk EC, IBM, innovaphone, Microsoft, Siemens, SAP and TE-Systems.
