Press release from: [Gateway Asia Limited](#)

New on the Thai market: multi-vendor hotel booking engine

At the TTM+, Gateway Asia introduced a unique hotel booking engine, in which several hotel vendors can be compared and booked. The range includes over 100,000 hotels by vendors, such as GTA, Miki Travel, Tourico, Asian Trails, Bonotel, You Travel, Jacob, Travalco and many more.

Because several hotel vendors can be compared and booked in one system, the travel agent is always guaranteed to get the right hotel at the best price. The interesting net prices can be increased by travel agents themselves, and cancellation conditions can be set.

The global hotel range includes one- to five-star city, leisure, business and resort hotels in cities and tourist destinations, as well as more quiet areas.

The engine is offered as an agent's tool and is also available in a B2C version for selling hotels via the travel agent's website. The first Thai travel agents have already shown great interest in this multi-vendor hotel booking engine and will soon be connected.

This week we are present on the ITE Hong Kong, Stand number T 107
