

## **iDTRONIC offers the new Mobile Bluetooth RFID Reader I-Collect for mobile scanning of LF or HF transponders**

Date: 06-11-2009 03:36 PM CET

Category: [IT, New Media & Software](#)

Press release from: [iDTRONIC Electronic Identification GmbH](#)

Agency: **none**

iDTRONIC, a leading supplier of RFID Hardware products, today announced the new I-collect, a mobile RFID data collector available as LF and HF Multitag version.

This small device with great performance is designed for mobile applications where form factor, weight, ease of use and portability are the important keys. iDTRONICs

I-Collect fits perfectly to Logistics, Inventory Management, Asset Tracking, Security, Maintenance and Access Control applications.

The new Mobile Bluetooth Reader I-Collect is small, but extremely robust. The integrated 1700mAh battery provides autonomy for 16.000 tag readings and the full recharging is completed within two hours.

iDTRONICs I-Collect is fully programmable. Beside the reading of the UID numbers it is possible to read also other memory

content. The I-Collect data collector allows fast and reliable Data transfer to Windows XP, Vista and Mobile applications. A demo Software with 8 standard applications is delivered with the I-Collect. The Software menu of the I-Collect is already available in six standard languages.

The integrated real-time clock is ideal for proof of visit or time stamps. iDTRONIC's mobile Bluetooth readers I-Collect can use its internal memory for batch mode and storage of up to 16.000 tag IDs. The intuitive user interface consists of three buttons, a modern blue light LCD Screen for Time display and UID reading and sound beeping for successful scanning.

The integrated USB + Bluetooth interfaces can easily communicate with a large variety of devices as PDA's, smart phones, laptop computers or tablet PCs.

iDTRONIC's mobile Bluetooth Reader I-Collect is available as I-collect LF for the most common 125kHz transponders and as I-Collect HF for 13.56 MHz tags (Mifare, ISO14443 + ISO15693).

For more information about the I-Collect and all other mobile RFID Readers from iDTRONIC, email us or visit our website.

#### About iDTRONIC Electronic Identification

iDTRONIC GmbH is a leading supplier for professional RFID Readers and RFID Tags / Transponders. iDTRONIC products are available for the passive RFID standards LF 125kHz, HF 13,56MHz and UHF 860–960MHz as well as an active system working on 2,45GHz frequency.

The range of professional RFID Readers include the industrial RFID Readers of the "Bluebox" series, RFID solutions for Mobile Terminals, RFID OEM Readers / Antennas and attractive RFID USB Readers.
