

## High-performance doors for high-performance cars - EFAFLEX builds doors for Porsche Centre in Vietnam

Date: 06-18-2009 04:05 PM CET

Category: [Logistics & Transport](#)

Press release from: [EFAFLEX Tor- und Sicherheitssysteme GmbH & Co. KG](#)

Each of the two companies is a specialist in its field and stands for reliability, speed and high-quality design: the cars of Porsche and the high-speed doors of EFAFLEX feature together in Ho Chi Minh City, Vietnam. The door specialist has installed four high-speed turbo doors in the Porsche Centre.

Peer Marzahn, After Sales Director of Prestige Sports Cars Co. Ltd., the official Porsche importer for Vietnam, chose the door manufacturer from Bruckberg, Lower Bavaria, for two reasons: "The technology of these doors, their very high opening and closing speed are absolutely convincing." In order to put the fast luxury cars in a favourable light, the four EFA-STT® are completely made of transparent laths. "The modern design of the doors perfectly matches the Corporate Identity of Porsche", gives Peer Marzahn another reason for having chosen these doors. The Porsche Centre, which was opened in January 2009, is situated directly within the new Business District of Ho Chi Minh City. The after sales area with workshop and check-in has a surface of 400 m<sup>2</sup> and the new show room has another 400 m<sup>2</sup>. Six cars are permanently presented to the clientele there.

When established in 1974, EFAFLEX was the first company in the world to deal exclusively in Highspeed doors. And that was quite deliberate. For this vision gave us the advantage right from the word go.

Today, EFAFLEX is the pioneering manufacturer of High-speed doors and the undisputed leader in this technology. The company employs 800 employees worldwide. EFAFLEX is based in Bruckberg, Bavaria, just twenty minutes away from Munich airport. From here, we serve the distribution network that has reached over all five continents since 1994.

EFAFLEX has been offering innovative and creative engineering technology from Germany for more than 30 years.
