

Make your own All-in-One-PC: Shuttle presents the X50 Barebone

Date: 06-23-2009 02:22 PM CET

Category: [IT, New Media & Software](#)

Press release from: [Shuttle Computer Handels GmbH](#)

Memory and hard disk can be chosen individually

Shuttle Inc., the market leader in the Mini-PC segment and manufacturer of Multi-Form-Factor solutions, is now shipping the All-in-One-PC X 5000TA that was shown at the Computex in Taipei as a barebone. Now users can decide for themselves which components should be installed in their All-in-One-PC.

Now individualists can really get their money's worth. With the Shuttle X50 Barebone the decision for HDD or SSD, 512 MB or 2 GB DDR2-memory is totally left to the purchaser of this little gem that is only 3.6 cm thin.

Shuttle is delivering the barebone, available in both black or white, with an Intel Atom 330 dual-core processor (2x 1.6 GHz), 15.6" touchscreen, a 1.3 megapixel webcam, card reader, Gigabit-LAN, WLAN (Draft-N), stereo speakers, microphone and a fanless 65 Watt power supply.

"The market introduction of the X50 Barebone has enabled customers to adapt Shuttle's All-in-One-PC even more flexibly to their own requirements," says Tom Seiffert, Head of Marketing & PR at Shuttle Computer Handels GmbH. "For sophisticated technical users it can be built in only a few steps."

The detailed installation guide is a helpful tool for the installation of missing components or for upgrading the hard disk and memory. The operating system is then deployed via USB drive or via the network.

The Shuttle X50 Barebone is available from specialist retailers from the end of June 2009. Shuttle's recommended retail price is EUR 361 (ex VAT). Suppliers can be found using the "Shuttle StoreLocator" www.shuttle.eu/buy.
