

## Pleasingly high demand for the X-ray inspection solution Y.Cheetah exceeds expectations

Date: 06-25-2009 08:28 PM CET

Category: [Industry, Real Estate & Construction](#)

Press release from: [YXLON International GmbH](#)

Garbsen, June 22, 2009: Despite the currently difficult global economic situation, YXLON International, a leading supplier of industrial X-ray inspection systems and industrial CT (computed tomography) solutions for the non-destructive testing of materials (NDT), reports impressive sales figures for Y.Cheetah, the X-ray inspection system that had been presented for the first time only as recently as March 2009.

Even now it can already be seen that the demand for Y.Cheetah in the first year is going to exceed the company's expectations. Customers' decisions from the electronics, printed circuit board and automotive industries in favor of the diversely, flexibly deployable Y.Cheetah are based above all on the system's easy operation. As a result of the "1-click strategy", all key functions can be reached via just one mouse click. A very brief round of introductory training is all it takes to be able to generate brilliant, highly detailed X-ray images with Y.Cheetah. What's more, the outstanding price: performance ratio is setting standards on the market for universally deployable X-ray systems. That's having an additional impact on promoting sales, too!

About YXLON International GmbH

YXLON International GmbH, a leading supplier of industrial X-ray inspection systems and computed tomography (CT) solutions for non-destructive testing of materials (NDT), is an innovative high-tech company with long tradition. Since June 2007 YXLON is part of the COMET Holding AG (Switzerland). At the same time the COMET Feinfocus business unit in Garbsen (Hanover, Germany) was affiliated to the YXLON group. Now YXLON can cover the increasing demand for microfocus X-ray- and computed tomography solutions, which are used for example in the electronic industry.

With its headquarters in Hamburg (Germany), several subsidiaries and a tight network of agents, YXLON supplies solutions for any production process, service- and maintenance application, whether in shipbuilding, vessel and pipeline inspection, the automotive industry, aerospace and aviation or microfocus inspection in the electronic industry.

The product portfolio includes microfocus- as well as conventional X-ray and computed tomography technologies and ranges from portable devices for on-site inspection up to complex, fully automated customer specified solutions and last but not least to the Feinfocus X-ray and  $\mu$ CT solutions.
