Press release from: [Torrey Hills Technologies, LLC](#)

(SAN DIEGO, CA, June 16, 2009) -- Torrey Hills Technologies, LLC today announced appearance at Intersolar North America Trade Show 2009, the most diverse international business-to-business trade show in the United States for the global solar industry. The trade show will be held at Moscone Center West, San Francisco, CA from July 14 to 16.

Torrey Hills' full range of fast fire conveyor belt furnaces will be featured in the show. Fast fire conveyor belt furnaces serve diverse industries such as solar cell (photovoltaics) manufacturing, microelectronics packaging, and advanced materials processing (thick film, metals, ceramics, and various electronic components).

Visitors are encouraged to stop by Torrey Hills' booth #8560 and talk with company representatives about furnace features, specifications and installation services. For more information about our furnaces, please visit www.beltfurnaces.com. For additional information about Intersolar North America Trade Show 2009, please visit www.intersolar.us.

"I am very pleased to see the fast growth of our furnaces business. Especially in the production of low-cost 3rd generation Dye Solar Cells (DSCs), our furnaces have secured a dominating position," stated Ken Kuang, president of Torrey Hills Technologies, LLC. "We are very excited to exhibit our belt furnaces at the Intersolar North America 2009 tradeshow. Be sure to come and visit us."

Torrey Hills Technologies, LLC (torreyhillstech.com) is a leader in developing advanced yet affordable equipment and supplies for electronics industries. Since its establishment in 2004, the company has expanded its business from microelectronics packaging components to large-scale furnace equipment for both electronics and alternative energy industries. Its mission is to help a fast-growing number of customers achieve higher profitability by the provision of innovative products and services. Headquartered in San Diego, California, the company is now shipping world-wide to more than 30 countries.
