Press release from: [Gecad Technologies AXIGEN](#)

The AXIGEN Mail Server 7.2 Beta is the first step towards the ambitious goal of taking Web communication interfaces to the next level

Bucharest, Romania, July 20th, 2009. AXIGEN, (axigen.com), the professional messaging solution vendor, announces today the beta release of a new version of its messaging solution featuring an innovative user-centric WebMail interface. Based on the AJAX technology, the new interface has been completely revamped to provide users with a desktop-like experience.

The new WebMail Interface features an overall optimized look-and-feel. Keyboard navigation and shortcuts, drag-and-drop, live email list view, frequent folders, all the new intuitive features of version 7.2 are designed to render email related tasks effective and pain-free, by allowing users to rely on shortcuts and time saving tricks they have already learned while using classic desktop email clients such as Outlook or Thunderbird.

The innovative WebMail technology brings multiple, customizable advertising capabilities, also introducing white branding options. Third party applications such as portals or community-related tools are granted extended live access to mailbox information – unread emails, upcoming events or tasks, total number of messages and much more.

“This is only the first public appearance of AXIGEN’s new WebMail technology which revolves around improving the overall user experience when accessing web-based email communication tools, with a powerful range of innovative additions already planned for future WebMail Interface versions. We invite you to test AXIGEN 7.2 and share your thoughts and comments on making it more effective, intuitive and user friendly”, said Oana Bornaz, AXIGEN CEO.

To test the new AXIGEN 7.2 version Beta now, please visit: www.axigen.com/beta-testing/

About AXIGEN and Gecad Technologies

Established in 2001, Gecad Technologies SA, member of the GECAD Group, is the vendor of AXIGEN, a messaging solution for professionals that ensures an efficient and secure worldwide communication environment and business growth for both service providers and companies of all sizes.
