

Pageflakes introduces sharing and publishing feature for everyone

Date: 05-10-2006 06:22 PM CET

Category: [IT, New Media & Software](#)

Press release from: [Pageflakes](#)

Agency: **Pageflakes**

The personal start page service www.pageflakes.com no offers all its users to publish and share their pages. Until now you were able to setup your very own personalized start page with news feeds and over 70 content modules (e.g. local weather, stock information, sport results, task lists and much more).

Now you can invite your friends or colleagues to use those personalized pages jointly. Business users can share contacts, task lists, notes, calendars and other sources. Sports Clubs can invite their members to setup joint pages with their favorite sport news and keep track of results. The options are endless.

Setting up your own page takes less than 2 minutes. You don't need any programming skills or other technical skills. Pageflakes follows a desktop type navigation and user interface that makes it possible for everyone to setup a unique and customized page instantly. Of course, the service is free of charge.
