Press release from: [Elite Lifestyle Consulting Inc.](#)

More Than Traffic (MTT) guarantees to generate \$100,000 USD to any existing website in only four months. Using a refreshing 'Pay On Results' payment model, MTT is quickly revolutionising the way online business owners are making money online.

Revelstoke, BC (PRWEB) May 24, 2006 - In the world of online business, it is often a challenge to successfully promote one's website. From pay-per-click campaigns to free traffic exchanges to search engine optimization, it can be a somewhat difficult (not to mention costly) task for online business owners to find the most effective way to market their website(s). Unfortunately, many online entrepreneurs end up quitting their online ventures due to the many challenges faced with online marketing.

This is where More Than Traffic can rescue failing online businesses or turn successful ones into an even higher earning category. MTT claims that they are not a marketing company or a search engine optimization service, but a revolutionary service that uses unique software to generate and deliver 'real' serious, ultra-targeted, ready to buy search engine traffic to their clients' websites. Over four years ago, the techs at MTT began creating their unique software to market adult entertainment and casino sites for clients all around the world. In fact, they quietly generated over 29 million customers, members and affiliates in the adult and casino industry. Adult website promotion is arguably the hardest industry sector to promote, and with the help of their software, MTT has generated in excess of \$2 billion for some of the most well known adult and casino websites in the world. Over the last 36 months, they've been modifying and updating their software to create a hybrid solution to deliver 'vertical traffic' to mainstream websites. The high-tech-inteli-software now operates on a new and improved multi-tiered platform to suit all types of mainstream websites. It now functions using newly inbuilt artificial intelligence to deliver the same results to any online business.

For a limited time, More Than Traffic is offering a free trial of their services and guaranteeing that each new client will generate \$100,000 USD in four months by using their services. They have an impressive Income and Performance Guarantee, where they have implemented a 'Pay On Results' payment model. Therefore, service fees are not charged in advance and clients are only charged when MTT has generated \$100,000 for them. At that point, the client is required to pay More Than Traffic \$15,000 after MTT has generated \$100,000 to the clients website. If the client doesn't earn \$100,000 USD net profit from their existing website within four months, MTT promises to give the remainder of their service for free for one year, plus the client can keep all income generated through More Than Traffic. It is almost unheard of for online marketers to spend only 15% of their income on advertising and marketing campaigns, never mind being able to sit back and have highly skilled webmasters send guaranteed sales and sign ups to their websites. This is good news to online business owners looking to heavily increase their sales and perhaps obliterate the need for additional online advertising. According to the company website, MTT states "We obviously earn a lot of money from your traffic too, plus operate an extremely sustainable and profitable business plan. Affiliates and clients earn a lot of money at the same time as us. All three parties earn a lot more money when we deploy our software and give you a head start". More Than Traffic is expected to drastically increase the income of thousands of online entrepreneurs before the end of 2006.
