Press release from: [Gecad Technologies AXIGEN](#)

Mumbai, India and Bucharest, Romania, August 6th, 2009. AXIGEN (axigen.com), the professional messaging solution vendor, announces today the signing of a distribution agreement with Indian company Softcell Technologies (softcell.in). This new partnership is aimed at expanding AXIGEN's presence on the Indian messaging market.

Softcell Technologies has been one of the leading providers of IT services for 20 years, their core business being to provide customers with the ability to procure, deploy and manage their IT assets most effectively. They specialize in delivering end-to-end IT services that include sale and implementation of software and hardware, infrastructure management, application lifecycle management, computing and network security, networking including wide area and internet connectivity, facility management and remote infrastructure management.

"We are extremely pleased to partner with AXIGEN to provide highly secure, robust and scalable messaging solutions to our customers across India. We firmly believe that AXIGEN's solutions will further enhance Softcell's services portfolio in providing end-to-end collaborative messaging solutions to clients ranging from small, to medium and large enterprises", said Rahul Ursekar, National Manager of Inside Sales team at Softcell.

"We are very proud of partnering with Softcell Technologies in our mission to expand AXIGEN's reach in India. As we now benefit from their outstanding expertise and presence in the local information technology market, we are confident we will better adapt our messaging solutions to the emerging needs of Indian companies, helping them conduct their business in an time and cost effective manner," concluded Oana Bornaz, AXIGEN CEO.

One of the top ten messaging solutions in the world according to The Radicati Group, the AXIGEN Mail Server has a strong focus on meeting the needs of business customers, either directly or through Service Providers employing the Software as a Service (SaaS) model. Winner of the ServerWatch 2007 Product Excellence Award for the Communications Server category, AXIGEN runs on several Linux and BSD distributions, on Solaris, on Windows operating systems, on PowerPC and SPARC architectures and is becoming the messaging solution of choice for a growing number of service providers and enterprises worldwide.
