Date: 06-16-2006 10:30 PM CET

Category: [Leisure, Entertainment, Miscellaneous](#)

Press release from: [Grey Clock Publishing](#)

Agency: **None**

Believed to be one of the secret and hidden books of the Bible. It is a complete hidden text consisting of over 450 pages. It is possibly the most significant biblical discovery ever.

Ryder's Second Book, "God Found" Is Believed to be One of the Secret and Hidden Books of the Bible, Discovered just when it is most needed. It is a Complete Hidden Text consisting of over 450 Pages. It is Possibly The Most Significant Biblical Discovery EVER. "God Found" was hidden for Centuries within the King James Version (KJV) of the Bible before it was discovered by Craig Ryder.

"I'm not special, I look at things differently; I simply possessed a mixture of knowledge, talents and experiences that were needed to complete a job. Why was I chosen? I don't know that I was, perhaps I was listening though.

"I have been hearing stories of Secret Biblical books since childhood, and after reading "The Bible Code" By Michael Drosnin, I found the inspiration to search for other texts. Drosnin's book proved that there was encoded information within the Holy Scriptures. I believed that there must be other texts as well. If there really were other texts, one must be located within the English translation as well.

While reading Chapter 2 line 2 of Habakkuk, I read "Write the vision, and make it plain upon tables, that he may run that readeth it". That's intriguing I thought, since that was not the first time I read words indicating that there was content in plain site waiting to be viewed without interruption. The next day, I started to work. Starting with Habakkuk 2:2, I removed everything that was not a direct quote from G-d from that point through the rest of the Holy Scriptures. Avoiding every temptation to read it until I had a complete extraction I ended up with 13 pages of text (From books 35 through 39). What surprised me was not the amount of text I located, but the fact that it read very cohesively, as one thought or conversation. One coherent thought from G-d, over four books, written by a minimum of four people located in different places and times! If that wasn't amazing enough, this was written before the books were assembled into the sacred texts. With this find, the next step was simple. Start with Genesis and see what was there. "God Found" is the result of this find."

Ryder is the author of "A Collage of Thought" A philosophical a play on words and interpretations based upon the Meno paradox. It is Mind candy for philosophy students, and Not intended for anyone under 21 due to the lack of adequate life experiences to properly grasp it.."A Collage of Thought" was released through Grey-Clock earlier this year.
